VISION

"The Engine is The Heart of an Airplane, but The Pilot is its Soul!"
We at BWA aim to get best results and solutions for every aspiring cadet to fulfill their abilities of Professional Airmanship, Enhance Safety and Efficiency in Civil Aviation.

MISSION

We assure comprehensive training and keep continuous watch to improve results periodically. We work with our candidates from day one, Building the best is our motto and that is why we adapt our courses to meet the needs of each individual candidates. We understand that the only way to be on the top is by delivering results. We have trained aspiring candidates and given them the qualifications they need to be successful in working for the best airlines. Our mission is to continue this standard of excellence in each candidate, to provide quality education and training that responds to the need and challenges of an ever-demanding aviation industry.

WHY US

- ◆ We specialize in both Pilot Training as well as other Aviation Training programs based on DGCA requirements only.
- ◆ Backed by our instructors, members and colleagues who would deliver their experience of more than 15 years in civil aviation to attain highest levels for cadets.
- ◆ We have fixed limited of candidates in each batch, to maintain one on one interaction which is supported by an instructor-led, computer-based classroom teaching facilities designed and developed entirely by BWA.
- ◆ Our recommendations of partners are one of the most Self-Experienced and Trusted organization within India and Overseas who have given excellent results in the past keeping global aviation standards.
- ◆ Our training is flexible and specialized for students to ensure the highest quality of training giving the best results within minimum amount of time and cost effective.
- ◆ Our dedicated administration team would keep working in getting the best cost-effective programs offered and give immediate solutions for cadets in future.

info@bluewingaviation.com

Trifolds

About Us

The Organization, Blue Wing Aviation Pvt. Ltd. is setup by Capt. Ranjita Thaker. In the year 2000, she was felicitated by the Arji-Maharashtrian community to be the first lady pilot of the community. She is also the youngest woman chief ground instructor of India approved by DGCA in the year 2012.

BWA is a leading organization in pilot training for Civil Aviation. Backed by 15 years of experience in aviation training along with our friends and family, we continue to help define global training standards with our innovative, flexible training solutions to make flying safer, maintain professional standards based on DGCA requirements and spanning the entire career cycle of a professional pilot, from Cadet to Captain.

Services

- ◆ CIL / PPL / Conversion / CPL / ATPL ground training
- ◆ Flight Training (India / Abroad)
- ◆ Flight Operation Officer Training
- ◆ Cabin Crew / Ground Handling Training
- ◆ Type Rating on all aircrafts (A320/ B737/ ATR)
- ◆ DGCA & DGCA services

How to refine a clients brief?

1 Impose Questions

Give your client a list of questions about the project. The answers will serve as the first draft of your creative brief.

Conduct Research

Get to know your client & its audience. Spend time exploring on what has been done before & what is the project environment.

3

Narrow the brief

Using your clients input & your own research define the essence of the project. Update & refine your creative brief in response to your learning and create a single idea explaining significant features.

Define key messages

List the main messages the project needs to convey. Discuss the brief and start developing solutions that fits the project goals.

2

4

How to come up with designing concepts?

Start Sketching

After defining the basic purpose and idea of your project, get some pen-paper and start making some small quick sketches.

Set a time limit

Set a time period for defined number of sketches for better productivity. Keep each sketch on different page for better comparison.

Keep moving

Rather than erasing and refining a single sketch, make alternatives. Review your ideas and choose some to pursue further.

Get everything from everywhere

Be a sea sponge

Be actively absorbent and notice everything.

Keep a sketchbook

Make notes of everything you absorb. Remember, this metley assortment of notes will prove invaluable.

Make a database

Collect books and informative magazine, explore new designs. Bookmark idea & images you see online. Building a database is like building a library where you can borrow on demand.

Observe others

Learn how they get thier ideas and how thier designs function. Look at everything and learn something new each time.

HOW TO MAKE A CONCEPT PRESENTATION?

CHOOSING A FORMAT

Formats like Powerpoint, PDF, or PNG are easy to email, post outline or print out as well as to project on a screen.

MAKING AN OUTLINE

Setup a simple template with selections such as title, overview, challenge, prototype views, solutions, benefits, concept and drawbacks.

KEEPING IT SIMPLE

Simple & sketchy imagery keeps your audience focused on the product. Therefore use storyboards and photographs to demonstrate your idea. Keep your text concise, direct and consistent.

FILLING THE BLANKS

Use your outline as a prompt for quickly fleshing out a concept. Develop details as well as broader views.

Mobile Website VS Mobile Apps

- Accessed through browsing
- Navigational user interface
- Requires Connection
- Attracts larger audience
- Relatively inexpensive
- Somewhat limited feature

- Accessed being installed
- Interactive user interface
- Available Offline
- Better user engagement
- Relatively expensive
- Can make use of phone features - camera, location, etc.

Hey, I am a graphic designer. I design awesome graphics & provide unlimited revisions until you are 100% satisfied.

[SEND A DM](#)

YOUR REJECTED DESIGNS ARE YOUR FRIENDS.

Your Audience are **visually hungry**, they eat the designs with their **eyes**.

Help people **consume** your content /design with their **eyes**.

Analyze your rejected designs and **identify** its weakness.

Remember your rejected designs **help** you **solve** **problems**, more you solve more you **improve**.

Understand the **Brand** Language

STEP 1

Choose a Format

Select appropriate sizes for the design, and collect the elements/ material that reflects who your are.

STEP 2

Collect Imagery

Look at your products / services and select the images accordingly.

STEP 3

Design & Combine

Create connections between the materials and elements you collected to emerge the visual language of the brand.

Potential Questions to ask a client for the best design outcome.

1. What makes your project Unique?

2. Why you believe this project will succeed?

3. Who is you audience?

4. What results you expects after project launch?

What Questions you impose to your clients for the project brief?

MOBILE CASE DESIGNS

+91-8871975127, alphaartz@gmail.com

The background is a solid blue color with various decorative elements. There are several spheres of different sizes, some with a blue-to-purple gradient. A large circle with a thin blue outline is at the top center. A smaller circle with a blue-to-purple gradient is at the top right. A sphere with a blue-to-purple gradient is at the top left. A sphere with a blue-to-purple gradient is at the middle left. A sphere with a blue-to-purple gradient is at the middle right. A sphere with a blue-to-purple gradient is at the bottom right. A sphere with a blue-to-purple gradient is at the bottom left. A hexagon with a thin blue outline is at the middle left. A dotted line is at the top right. A dotted line is at the bottom left.

Thank You !
